PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with hands-on experience building full-stack web applications through academic and personal projects. Proficient in React, Next.js, JavaScript, TypeScript, NestJS, PostgreSQL, and MongoDB. Looking for Internship opportunity in software development or Junior Software Engineer role to apply my skills on real-world with a engineering teams.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C++, C#

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, NestJS, ASP.NET Core (.NET)

Databases: MongoDB, PostgreSQL, MySQL, SQL Server

Tools and Platforms: Git, GitHub, Postman, Vercel, Netlify, Supabase, VS Code, Figma, Notion, Balsamiq

Core Competencies: React, Next.js, NestJS, JavaScript, MongoDB, PostgreSQL, System Design

PROJECT EXPERIENCE

FitSync, a gym management web application – solo project

GitHub | Live

Tech stack: Next.js, Node.js, Express.js, MongoDB, Stripe, BetterAuth, Tailwind CSS

- Built and shipped a full-stack fitness management platform end to end, covering responsive UI development, user interactions, and backend integration.
- Designed and implemented 18 REST API endpoints across 6 MongoDB collections, including role-based access control and secure authentication built from scratch.
- Improved page load performance with server-side rendering and optimized data fetching, and integrated Stripe for payments and monetization.

IdeaVault, Idea Sharing Platform – solo project

GitHub | Live

Tech stack: Next.js, Node.js, Express.js, MongoDB, BetterAuth, Tailwind CSS

- Delivered a full-stack idea sharing platform, Idea Vault, from database schema design through user interface, enabling users to create, discover, and share ideas seamlessly.
- Designed scalable REST APIs and database schemas to support idea creation, categorization, user interactions, and efficient content management.
- Built a reusable and responsive component system that maintained a consistent user experience and accelerated development of new platform features.

Shopora, an AI-powered multi-vendor e-commerce platform – group project

GitHub | Live

Tech stack: Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Stripe, Better Auth, JWT, Tailwind CSS, Recharts

- Developed a full-stack e-commerce platform to solve product discovery and shopping-management challenges through centralized product browsing, Visual Search, AI assistance, checkout, payments, and order management.
- Implemented three role-based experiences: Customers for shopping and personalized discovery, Sellers for product and business management, and Admins for platform-wide user, product, and operational management.
- Built key customer and admin features, including Visual Search, brand discovery, cart, wishlist, checkout, AI recommendations, and product moderation.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering

2023 to 2027 (Expected)

American International University-Bangladesh (AIUB), Dhaka, Bangladesh

CGPA: 3.67

CERTIFICATIONS

- Complete Web Development Course, Programming Hero, 2026

LANGUAGES

English: Conversational. Bangla: Native.
