## Career Objective

---

Aspiring Software Engineering student with hands-on full-stack experience across the JavaScript/TypeScript ecosystem (Next.js, NestJS, Express, Node.js) as well as .NET and Java. Skilled in building role-based, production-style web applications end to end, working across MongoDB, MySQL, and PostgreSQL, and experienced with collaborative and design tooling (GitHub, Figma, Balsamiq, Trello, Notion). Looking for an internship opportunity where I can apply my technical knowledge, collaborate in real-world projects and enhance my software engineering expertise.

## Projects

---

### FitSync – a role based applicaiton, *Solo Project*

- Developed a full-stack fitness platform using Next.js, Tailwind CSS, Node.js/Express, and MongoDB for managing fitness classes and member activities.
- Implemented role-based dashboards for trainers and members, enabling class creation, management, enrollment, and activity tracking.
- Integrated Stripe payment functionality for secure online class enrollment and payment processing.
- Added interactive features including favorites, class details, forum discussions, comments, and user authentication to improve user engagement.
- Live Link : <https://fit-sync-gamma-puce.vercel.app>
- GitHub: <https://github.com/kallol-Dey229/fit-sync>

### Hireloop – a role based applicaiton, *Solo Project*

- Developed a role-based full-stack hiring/recruitment platform connecting recruiters and candidates through tailored workflows and permissions.
- Architected RESTful APIs in Express with MongoDB for structured, scalable data handling.
- GitHub: <https://github.com/kallol-Dey229/hireloop>

### English Janala – Interactive Vocabulary Learning Platform, *Solo Project*

- Built an interactive English vocabulary learning platform where users can explore words, meanings, and synonyms.
- Used HTML, Tailwind CSS, Daisy UI, JavaScript(ES6), and integrated a third-party REST API for word data.
- GitHub: <https://github.com/kallol-Dey229/English-Janala>

### Wanderlast, *Solo Project*

- Built a full-stack travel discovery application featuring idea/destination cards, detail pages, and JWT-based authentication.
- Collaborated across frontend and backend, integrating a clean, component-driven Next.js UI with an Express/MongoDB API.
- GitHub: <https://github.com/kallol-Dey229/wanderlast-client>
- Live Link: <https://wanderlast-client-coral.vercel.app>

### IdeaVault, *Solo Project*

- Developed a web platform where users can share, discover, and explore creative ideas in an interactive community-driven environment.
- Implemented features for creating, viewing, and managing ideas, allowing users to showcase their creativity.
- Added commenting functionality to encourage discussion and interaction between users.
- GitHub: <https://github.com/kallol-Dey229/IdeaVault-using-nextjs-mongodb-express>
- Live Link: <https://ideavault-using-nextjs-mongodb.vercel.app>

### **BookVibe, Solo Project**

- Developed a responsive web application using React that allows users to browse, search, and borrow books online. Implemented book management and borrowing functionality
- Created reusable React components and interactive user interfaces to provide a smooth and user-friendly experience.
- GitHub: <https://github.com/kallol-Dey229/Book-Vibe-Using-React>

### **Book Management System, Solo Project**

- Developed a book management system using ASP.NET and C#, covering core CRUD operations and data management.
- GitHub: <https://github.com/kallol-Dey229/BookManagement-with-dotnet>

### **Hostel Management System, Group Project**

- Collaborated on a hostel management system covering room allocation, resident records, and administrative workflows.
- GitHub: <https://github.com/kallol-Dey229/BookManagement-with-dotnet>

### **Inventory Management System, Group Project**

- Built a desktop/web inventory management system in C# with a MySQL backend, handling stock tracking, updates, and reporting.
- GitHub: [https://github.com/kallol-Dey229/Inventory-management-system-using\\_c\\_sharp-](https://github.com/kallol-Dey229/Inventory-management-system-using_c_sharp-)

## **Technical Skills**

---

### **Programming Languages**

C++, C#, JavaScript (ES6), Python, PHP

### **Backend**

NodeJs, ExpressJs, NestJs, ASP .NET Web API, RESTful API Development, PHP

### **Frontend**

HTML5, CSS3, Tailwind CSS, React JS, NextJs, HeroUI, Daisy UI

### **Database**

MongoDB, MySQL, MSSQL

### **Tools & Practices**

Git & GitHub, Trello, Notion, Figma, Balsamiq, VS Code, Visual Studio, Trello, Netlify, Vercel

### **Testing**

API Testing (Postman)

## **Soft Skills**

---

- Problem Solving
- Time Management
- Team Collaboration
- Fast Learner
- Communication
- Adaptability

## **Education**

---

### **Bachelor of Science: Computer Science and Engineering (CSE),**

2023 - Present

American International University-Bangladesh (AIUB)  
CGPA: 3.67

### **Higher Secondary Certificate: Science, Udayan Uchcha Madhyamik Bidyalaya**

2018 - 2020

GPA: 5.00

### **Secondary School Certificate: Science, Debidwar Government Reaz Uddin Pilot High School**

2018

GPA: 5.00
